

Shraddha Kukreja

Hi Friends,

The biggest achievement of my life that I have cracked the Aptitude test on 5th October.

Firstly, I have my email writing regarding thanking to Ms.Matt about her guidance and support to make my life successful. The email writing was of 10 minutes and I have done with that. Then switch to aptitude test which is of 80 minutes.

The question basically they have asked are on-

1. Time and work - 4 questions
2. Number system- 2
3. Percentage- 2
4. Time Speed - 4
Distance
5. Ratio & Proportion- 2

At 5.30,I come to know that I have cracked the aptitude test and I am selected for next round.

On next day,I have my interview ,so the first is technical round,the question they asked are given as below-

- 1) Minor and Major project-This was good for me because I knew each and every detail about the project.And I took 8 minutes to explained it properly, so the interviewer said good.
- 2) What is an array with example?
- 3) What is pointer to pointer?
- 4) What is Nested structure? Example
- 5) They have given me 4 condition like-

Cond1, Cond2, Cond3, Cond4,so they asked me either you will use (If else) or (Switch case).So ,I told Switch case, so they asked me which one is easy for Compiler to compile ,I said Switch, then he said ok.

- 6) Tell me the name of the subjects in final year.
- 7) Tell me about yourself.
- 8) Explain binary search tree.
- 9) Which subject you like most? But,they don't asked any question on that.
- 10) What is spanning tree?

Third round was MI, the questions they have asked are as given below-

- 1) Tell me something about yourself.
- 2) Tell me the last program you have typed before coming for the interview, so I said A* search algorithm, so tell me the applications of the algorithm,I said chess.
- 3) They asked me questions on that, so he gave me one condition that as horse move 2 ½ steps, so horse should move on each and every square of the chess board.Tell me the logic.
- 4) What is IT infrastructure services?
- 5) What is EIS?

Fourth round was PI, the questions they asked me are as follows-

- 1) Tell me something about yourself.
- 2) How your friends describe you?
- 3) What are your hobbies?
- 4) Are you comfortable with night shift?
- 5) Why TCS?
- 6) Why shall we hire you?

Please,if you are from CS/IT ,you must know the basic concept of the C and C++, the main thing is that you must be confident about what you are saying .

Be confident.

All the best for your future.
