

# TCS interview experience

Name of student: - Trilokynath Santosh Wagh

Batch: - 2018/19 (BE-Computer)

Date: - 23<sup>rd</sup> Aug 2018

I was shortlisted for the direct interview after clearing codevita round 1. There were nearly 132 students from Pune region. The process started at 10 AM and I was called for an Interview at around 6 in the evening. As they already has my resume in there hand and started firing the questions.

1. Tell me about yourself.
2. Tell me your favourite two subject.
3. Tell me about your projects.
4. Tell me difference between Desktop Application and Android Application
5. Which one is more challenging for you (Desktop Application and Android Application)? And why???
6. Draw the structure of your database you have used in your project.
7. Can you modify this structure for better representation?
8. Which operation are being done by your project.
9. Write the query for given table to perform given operation. (They will draw table for you). They asked me 2 queries. *E.g. write a query for finding the employee of company having 2<sup>nd</sup> lowest salary in the organization.*
10. Write a function for swapping of two numbers using pass by pointer
11. What is multilevel inheritance?
12. Types of OS

13. Why TCS

14. If you join TCS then which language do you prefer??

15. Which language is better and which language is worst.

16. Tell me more about your projects.

17. Have you done it individually or in group?

18. (In my case I have created 5 projects) From how many years you are doing this projects.

19. (My answer was 1 year for 18th point number) That means you have bunk the college for 1 year???

20. Do you have any questions for us??

Nice to meet you Trilokynath!!

**Finally I got offer letter by 30<sup>th</sup> Aug 2018!!**

Conclusion: -

1. Be confident on your technical knowledge and communication skill.
2. Your behaviour during the interview will help you a lot.
3. And main thing is your projects. Try to explain all your projects very confidently. And always try to relate any technical question with your project.
4. Refer online tips before going to the interview and practice it in front of mirror.
