

Interview Experience

As I got the provisional offer letter from TCS through the Testimony'16 before the actual placement process, I got exemption from the TR and MR round. I faced only the HR round.

Here are the questions which I faced.

1. Tell me about you and your experience through testimony.
2. Since how much time you are in touch with testing?
3. What sources did you used to learn testing?
4. What do you prefer more? Testing or Coding?
5. Can you enlist some testing types?
6. Do you know everything in detail about the types of testing you mentioned?
7. What is the difference between black box and white box testing?
8. What is automation?
9. When can you neglect the cost of testing?
10. What is a risk?
11. Why TCS?
12. Do you know any recent things about TCS?
13. Who is the MD of TCS?
14. You have mentioned many achievements here. Mostly first prizes in many events and you are a university topper too. How do you focus on all these things together?
15. Are you a team player?
16. What will you do if you are posted to a location where we don't ensure you about your security?
17. What if you don't get selected today?
18. Where do you see yourself after 5 years?
19. Are you interested in higher education?
20. Any questions for me?
