

TCS interview experience : Chetan Patil : Electrical engineering

1st round : Aptitude test and email writing

- For aptitude test preparation use quicker maths (M. Tyra).
- But important think which I have done that help me a lot I solve all paper given on campus gate website which have many repeated questions. Also download application TCS placement paper which prepare by m4maths website.
- For email writing prepare from technical baba and programming geek website which give real experience.

2nd round : Technical Interview (20 minute)

1. Tell me about yourself?
2. What is your hobby?
3. Explain your major project? (Use block diagram and prepare well about project most question ask on that. mine more than 50% interview on that after project he start asking questions related to electronics)
4. Symbol of stepup and stepdown transformer?
5. Difference between it?
6. What is star-delta connetion?
7. What is motor?
8. What is alternator?
9. What is generator?
10. Which is your favourite subject?
11. Any questions for me? (ask him at least single questions)

3rd round : Managerial round (15 minute)

1. tell me about yourself?
2. Explain your project?
3. What is hybrid car?
4. Why we don't use DC transmission line?
5. Why we use AC transmission line?
6. Why TCS?
7. Why I hire you?
8. Any question for me?

Try to give answer of every question because they just check your confidence level does matter what you speak.

4th round : HR round (5 minute)

1. Tell me about yourself?
2. Are ready for relocate?
3. Are you work in night ship?

4. What is your strength?
5. What is your short time and long time goal?

After long time waiting finally I got offer letter. Friends prepare well for campus you need just confidence and positive attitude.

BEST OF LUCK
